

MOHAMMAD BASEL BASHIR

SOFTWARE DEVELOPER

EDUCATION

Bachelor's Degree in Artificial Intelligence Engineering
Arab International University (AIU)

WORK EXPERIENCE

Software Developer Specialist

Syriatel Mobile Telecom | Oct 2023 - Present

Responsible for developing new applications and enhancing existing ones, focusing on performance, scalability, and bug resolution.

Projects:

Bulk Messaging System (BMS)

- Developed a scalable messaging platform for efficient mass communication across marketing, customer service, and enterprise sectors, serving media companies, financial institutions, and brands.
- Technologies: Spring Boot, Microservices, Docker, RabbitMQ, Oracle Database.

Akrab Elik Application

- Developed a user-focused mobile app for real-time support and account management, alongside a control panel enabling the marketing team to streamline service operations and customer interactions.
- Technologies: Java (backend), .NET Framework with Razor (control panel), PLSQL, Microservices, Oracle Database.

Fleet Management System

- Developed a fleet management solution with real-time tracking, usage metrics, and maintenance scheduling to optimize vehicle usage and reduce operational costs.
- Technologies: .NET Framework with Razor, Oracle Database.

PERSONAL DETAILS

Date of birth: 23/11/1999

Nationality: Syrian

Gender: Male

Military Service: Exempted

CERTIFICATES

▀ DevOps on AWS Specialization from Coursera 

▀ Deep Learning Specialization from Coursera 

▀ Docker Training Course from KodeKloud 

▀ UNIX and Linux from Syriatel Mobile Telecom 

LANGUAGE PROFICIENCY

Arabic: Native

English: Good

DevOps & Operations Specialist

Syriatel Mobile Telecom | Sep 2022 - Sep 2023

Implementing DevOps involves setting up infrastructure and pipelines for multiple programming languages.

Containerized applications and databases using Docker to improve workflows and deployments.

Projects:

E-Games

- Developed and supported a winning card draw application utilized in events for drawing cards containing various rewards. Containerized both the application and database as Docker.
- Technologies: PHP, HTML, CSS, JavaScript, MySQL, Docker.

Software Engineer

Elev8xr | Nov 2024 - Feb 2025

Worked extensively on SEO and WordPress, optimizing websites for search engines by implementing on-page SEO strategies, enhancing site structure, refining meta tags, and integrating schema markup to improve visibility and ranking. Managed technical SEO aspects, including site speed optimization, structured data implementation, and ensuring mobile-friendliness for an improved user experience. And, utilized industry-leading tools such as Google Analytics, Google Search Console, and Yoast SEO to monitor performance and refine strategies based on data-driven insights.

Projects:

Kabinetry 

- Optimized WordPress site for SEO-friendly content and seamless performance, ensuring adherence to best practices for improved rankings.
- Enhanced user engagement through strategic keyword optimization, structured content, and continuous performance improvements.
- Tools & Technologies: WordPress, SEMrush, PageSpeed Insights, Google Search Console, Google Analytics, Yoast SEO.

Full Stack Developer - Freelancer

Wareed

Wareed Website 

- Developed a responsive medical website in partnership with Wareed, providing users with an intuitive platform to view and search for doctors, book appointments within specified time frames, and access additional services. A dedicated dashboard allows doctors to manage appointments and other essential controls.
- Technologies: Laravel, Vue.js, Bootstrap, MySQL.

Leading Cities

Buhothy Website 

- Developed a user-friendly website tailored for Gulf students, enabling them to order educational research based on specific requests. The platform includes a payment system for processing orders and an admin dashboard for managing user interactions and content.
- Technologies: Laravel with Blade, JavaScript, Bootstrap, Stripe, MySQL.

Back End Developer - Internship

Golden Soft | Aug 2023 - Sep 2023

Developed new applications using PHP and Laravel framework.

Projects:

Qondos

- Developed an application enabling clients to request home maintenance services and set their location to find the nearest service. The application supports multi-authentication for clients and maintenance personnel and includes an admin dashboard for managing requests and users.
- Technologies: Laravel, REST APIs, Blade, Bootstrap, JavaScript, MySQL.

Glasses Store

- Created a dashboard for registering and managing client files, including details of their purchase history. The system streamlines client management and enhances customer service capabilities.
- Technologies: Laravel with Blade, Bootstrap, JavaScript, MySQL.

EDUCATIONAL PROJECTS

Smart Baby Stroller Control System - Junior Project

- Designed an IoT project to automatically rock a stroller back to sleep to calm a waking baby.
- Technologies: Arduino, Firebase, JavaScript, HTML, CSS, Bootstrap, NodeMCU ESP8266, Motors, Stroller.

Website Generator - Senior Project

- Created a website to generate HTML code from images, text, or sketches.
- Technologies: PyTorch, Deep Learning, React.js, Bootstrap, Django, Domain Specific Language (DSL).

OTHER PROJECTS

E-commerce and Real-Time Chat Platform with Microservices Architecture

- Developed a scalable e-commerce platform using microservices architecture with dedicated services for customers, products, orders, payments, and notifications. Integrated real-time chat with WebSocket for enhanced user engagement. Leveraged technologies like Spring Boot, Kafka, and Keycloak for seamless communication, authentication, and authorization.
- Technologies: Spring Boot, Kafka, Keycloak, WebSocket, Firebase, PostgreSQL, MySQL, MongoDB.

E-commerce System

- Built an online product ordering platform with Stripe payment integration, Firebase for image storage, and a management dashboard for administration.
- Technologies: Laravel, Blade, Alpine.js, Bootstrap, Firebase, MySQL.

Invoicing Management System

- Developed a debt collection dashboard for companies managing collections for banks.
- Technologies: Laravel, Blade, Bootstrap, MySQL.

Traveling Website

- Designed a travel website showcasing destinations and trip details.
- Technologies: Java, JSP, Bootstrap, MySQL.

SKILLS

Programming Languages:

- Java, C#, C++, PHP, JavaScript, Python, HTML, CSS

Technologies & Tools:

- Spring Boot, Laravel, ASP.NET, Vue.js, WordPress, SEO, Firebase, Bootstrap, Git, Docker, Kafka, RabbitMQ

Databases:

- Oracle, SQL Server, MySQL, PostgreSQL, MongoDB
